BASIS FOR THE AMENDMENT

Claims 2, 11-16 and 20-22 are active in the present application. Claims 1, 3-10 and 17-19 have been canceled. Claim 2 has been amended to require that the claimed power source have a negative electrode that contains vapor grown carbon fibers and a carbon material of specific lattice spacing. Support for the amendment that the lattice spacing is from 0.37 to 0.38 nm is found on page 10, last line. Support for the amendment is found in Example 6 of the specification and Table 1 on page 24 of the specification.
